PROJECTS

E-commerce Platform Development

- Developed and deployed Java-based microservices using Spring Boot to support a scalable and maintainable architecture.
- Utilized RESTful APIs for service communication and integrated Spring Cloud for managing microservices across distributed environments
- Worked on database integration with MySQL, ensuring data consistency across services

Technologies Used: Java, Spring Boot, MySQL

Simple To-Do List App

- I developed a Simple To-Do List App that allows users to manage their daily tasks efficiently.
- The application provides basic features like adding, viewing, marking as completed, and deleting tasks.
- This project helped me understand the basics of CRUD operations (Create, Read, Update, Delete) using Java and MySQL. It also gave me hands-on experience in full-stack development with frontend, backend, and database integration.

Technologies Used: Html, CSS, Java, MySQL

SKILLS

Programming Languages: Java, Html, CSS, JavaScript, Python
Frameworks : React.js, Node.js, Spring Boot
Database : MySQL
Tools / Platform: VS code, IntelliJ, Eclipse, MS Office
